Finished goods - Beginning Inventory: ..... 400
Finished goods - Ending Inventory: ..... 500
Direct labor for production: ..... 800
Indirect labor for production: ..... 250
Indirect raw materials for production: ..... 450
Electricity for the production process: ..... 50
Administration expenses: ..... 350
Rent costs for the production department: ..... 200
Maintenance costs for production machines: ..... 150
Selling expenses: ..... 550
Depreciation for production machines: ..... 150
Fuel costs for production machines: ..... 50
Interest expense ..... 10
Tax expense ..... 390
Sales revenue: ..... 6,000
Required: Calculate the gross profit and net income before taxes for ABC .Solution

## Exercise 1.2 Master budget

ABC is a manufacturing firm that produces the product X . ABC has the following information regarding the forecasted sales for the next year 2023:

|  | Quarter |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |
|  | $1^{\text {st }}$ | $2^{\text {nd }}$ | $3^{\text {rd }}$ | $4^{\text {th }}$ | Total |
| Forecasted sales (in units) | 20,000 | 30,000 | 30,000 | 40,000 | 120,000 |

The selling price for X is $€ 20$. The cash collection policy of ABC is as follows: $60 \%$ of revenues is collected in the quarter that the sale was made and the rest $40 \%$ in the quarter following. At the end of 2022, "Accounts Receivable" had a balance of $€ 180.000$.
Required: Prepare a sales budget and cash receipts schedule.

## Solution

| Sales Budget | Quarter |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | $1^{\text {st }}$ | $2^{\text {nd }}$ | $3^{\text {rd }}$ | $4^{\text {th }}$ | otal |

| Accounts receivable 31/12/2023 |  |  |  | 320,000 |  |

At the end of each quarter, ABC would like the ending inventory of finished products being equal to $30 \%$ of the sales (in units) of the next quarter. At the end of the fiscal year, the ending inventory should be equal to 4,000 units. At the end of 2022, the finished products were 9,000 units.
Required: Prepare a Production Budget.

## Solution

Production Budget

Forecasted sales in units
Plus: Required ending inventory
Less: Beginning inventory
Units to be produced

| Quarter |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |

To produce $\mathrm{X}, \mathrm{ABC}$ uses a raw material called Y . Production requirements suggest that 1 unit of X requires 5 kilos of Y. Moreover, at the end of each quarter, ABC wants an ending inventory of raw materials equal to $10 \%$ of the required raw materials for the production of the next quarter. At the end of the fiscal year, the ending inventory of raw materials should be equal to 20,000 kilos. The beginning inventory of Y is 10,000 kilos.
The price of Y is $€ 0.3$ per kilo. ABC pays $50 \%$ of the purchase cost in cash and $50 \%$ in the quarter following. At the end of 2022, "Accounts Payable" had a balance of $€ 15,000$.
Required: Prepare a Raw Materials Budget and Cash Payment Schedule for raw materials purchases.

ABC has estimated that 1 unit of X requires 0.5 direct labor hours (DLH). The cost of each hour is $€ 15$.
Required: Prepare a Direct Labor Budget.

## Solution

| Direct Labor Budget | Quarter |  |  |  |  |  |  |  |
| :--- | ---: | :--- | :--- | :--- | ---: | :---: | :---: | :---: |

| DL Cost |  |  |  |  |  |  |  |  |

General Manufacturing Overheads are a mixed cost. For the variable part, ABC uses an overhead rate equal to $€ 5 / \mathrm{DLH}$. The fixed part is estimated to $€ 57,500$ per quarter.
Required: Prepare an overheads budget and calculate the total overheads rate per DLH.

## Solution

| Overhead Budget | Quarter |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | $1^{\text {st }}$ | $2^{\text {nd }}$ | $3^{\text {rd }}$ | $4^{\text {th }}$ | Total |

A standard policy of ABC is to retain zero beginning and ending inventories of work in progress.
Required: Prepare an ending inventory budget.

SGA Expenses consist of variable and fixed costs. The variable part is estimated as $€ 1,80 /$ unit. The fixed cost is $€ 99,000$ per quarter.
।
Required: Prepare an SGA Budget.
Solution

The following information is available for ABC :

- Beginning cash balance was $€ 102,250$,
- Direct labor cost is paid in cash. Manufacturing OH are paid in cash but they include $€ 20,000$ depreciation costs per quarter. SGA expenses are paid in cash but they include $€ 15,000$ depreciation costs per quarter.
- The firm will acquire an equipment of $€ 260,000$ and the cash payments will be as follows:
$1^{\text {st }}$ quarter: $€ 140,000 ; 2^{\text {nd }}$ quarter: $€ 60,000 ; 3^{\text {rd }}$ quarter: $€ 40,000$; and $4^{\text {th }}$ quarter: $€ 20,000$.
- A cash dividend of $€ 8,000$ will be distributed each quarter.
- The ending cash balance of each quarter should be at least $€ 100,000$.
- ABC has an agreement with a local bank to receive loans that are multiples of $€ 10,000$ (e.g., $€ 10,000,20,000,30,000$, etc.) at the beginning of each quarter. The monthly interest rate is $1 \%$ (assume simple interest for ease of calculations). The borrowed capital and the accrued interest are repaid at the end of the year as long as the minimum threshold of $€ 100,000$ ending cash balance is satisfied.
Required: Prepare a Cash Budget.
