School Of Economics
Master's Program
M.Sc. in Economics

MATHEMATICS

Winter Semester 2023-2024
Tuesday 12:15-3:00 pm / Main Building, Derigny Section, 5th Floor

Instructor: Vangelis Vassilatos
vvassila@aueb.gr
tel: 210-8203716
Main Building, Derigny Section, 4th floor
Office hours: Monday 18:00-19:00pm

Teaching Assistant: Maria Gkioka
gkiokam@aueb.gr

Course Outline

This course is an introduction to commonly used dynamic optimization methods in economics. The emphasis is on solution methods rather than rigorous proofs. After completing the course, students will be able to compile the knowledge they have gained and, apply the techniques mastered in order to analyze, evaluate and solve dynamic models.

Evaluation

The course grade will be determined by the final exam.

A 10% bonus will be awarded to all students that will fulfill all assignments that will be distributed during the course. The bonus is not valid for the September resit examination period.

Syllabus

- A. Dynamic Optimization in Discrete and Continuous Time Dynamic Systems
 - A1. Optimal control
 - A2. Dynamic programming

- B. Discrete Dynamics
 - B1. First, second and higher order linear difference equations
 - B2. Linear difference equation systems

C. Solution methods of linear rational expectations systems

D. Continuous Dynamics

D1. First, second and higher order linear differential equations

D2. Linear differential equation systems

D3. Phase Diagrams
