
Some further typo corrections on the file "Consistency (Theory and Examples)" as suggested by a student:

- In page 3, inequality (3), $\mathbb{P}(M \|\theta_n - \theta_0\| > \frac{\epsilon}{2})$ should be replaced by $\mathbb{P}(M \|\theta_n - \theta\| > \frac{\epsilon}{2})$.
- In pages 5-6, remark 1., replace "or when Θ is convex and closed and c_n is a strictly convex function", with "or when Θ is convex and closed and c^* is a strictly convex function".
- In page 6, in the Linear Model Example, the hypothesis $\text{Var}(X_n/\sigma(X_n)) = I_{n \times n}$, should be obviously replaced by $\text{Var}(\varepsilon_n/\sigma(X_n)) = I_{n \times n}$.
